

## EDUCATION CONNECTION Presents

### *Achieving Excellence* Guides for School Improvement

With many years of experience working collaboratively with our districts in the on-going process of improving student achievement, we have developed guides to assist instruction: *Achieving Excellence: Using Data to Improve Student Performance*, *Achieving Excellence: Creating a School Improvement Plan* and *Achieving Excellence: Building Standards Based Units of Study*. Designed for today's busy educational leader, these focused and user-friendly guides provide an overview of the steps and strategies necessary to use data in the School Improvement Process. EDUCATION CONNECTION staff are available to provide on-going training and facilitation to support the use of these informational guides.

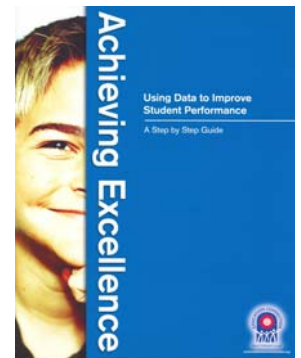

### Creating a School Improvement Plan

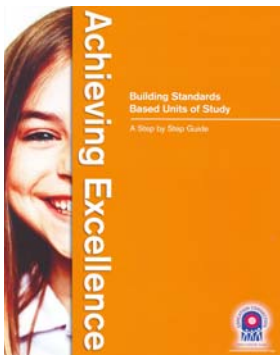

The School Improvement Process is an ongoing collaborative cycle, focused on continuous school improvement. To ensure continuous improvement, it is important for schools to have a systemic process in place to assess progress toward achieving **Critical Performance Expectations**. This resource guide presents an overview of the School Improvement Process and provides several fundamental strategies that schools may use to begin a review of educational practices. \$8.95

### Using Data to Improve Student Performance

This guide provides an ordered way to link student work, school or district and state assessment data to improve student achievement. The process outlined in this guide enables school and teacher teams to structure their use of data by starting with the **Critical Performance Expectations**, and ending with the analysis of daily student performance through formal and informal classroom based assessments. \$8.95

### Building Standards Based Units of Study

Standards are meant to provide direction and focus to the teaching, learning and assessment process. This guide defines standards and helps districts identify what implied skills and knowledge are embedded in a standard. The implementation of a standards based approach to teaching, learning and assessment provides a focus that allows educators to more accurately measure and ensure high achievement for all students. \$8.95
